

M&S AI Roadmap Data Strategy to Smart Automation

Understand Current Business Environment

- Business Strategy
- Regulatory Environment
- Existing Staff and Skills
- Existing Software Applications

Define Data, Analytics, and AI Strategy

Data Quality Assessment	Data & Analytics Strategy
Data and Content Inventory	AI Strategy
Use Case Prioritization	Gap Assessment
Data Governance/MDM Strategy	Implementation Plan

Define & Implement Data Platform

Privacy, Security, & Access Control	Data Storage
Data Governance / MDM	Data Integration
Software Selection	Data Preprocessing
Architecture & Infrastructure	Data Analysis & Reporting

Leverage Built-in AI Capabilities

- Core Operational Systems
- Office Tools & Copilots
- Customer-Facing Apps (CRM)
- Internal Enterprise Apps (ERP, HR, MES)

Identify Machine Learning Apps & Requirements

- Classification Apps
- Prediction Apps
- Computer Vision Apps

Generative AI Apps

Generative AI Apps

Privacy & Security	Source Content Corpus
Evaluation Metrics	Grounding in Truth
Semantic Search	Continuous Update
Prompt Engineering	Quality Verification

Develop Machine Learning Apps

- Model Training
- Model Tuning
- Model Testing
- Model Feedback

Implement Smart Automation & Workflows

- Application Integration
- RPA / IPA Bots
- Workflow Visualization
- MLOps

Deployment

- Stakeholder Communication
- User Training
- Human Feedback
- Continuous Improvement
