

CAPABILITIES OVERVIEW

Rapid Agility *with* Scalable Capability

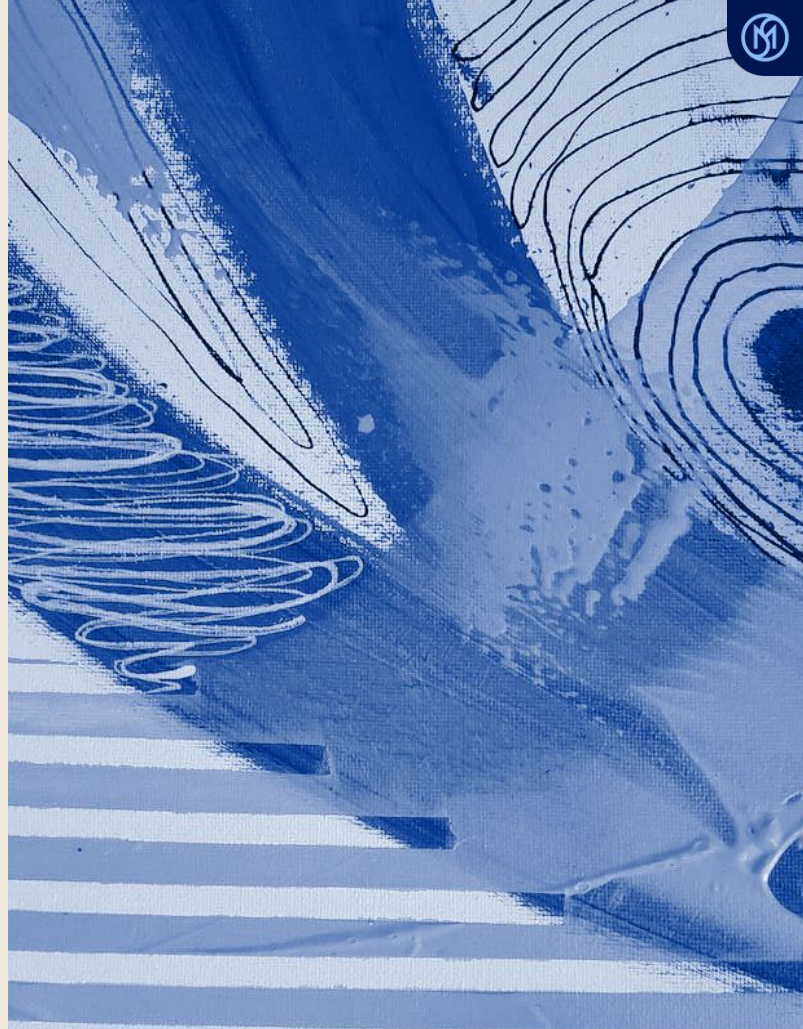

Enterprise Technology and Business Systems Integrator

WHO WE ARE

The 'doers' to get your project *done*

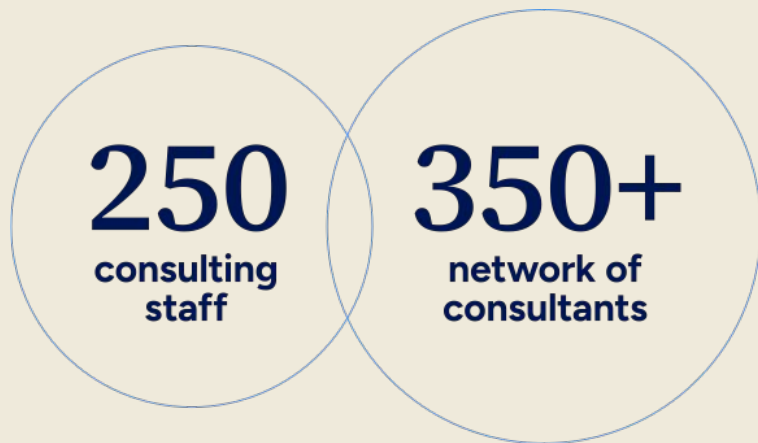

Since 2002, M&S Consulting has been a trusted partner for commercial and public sector clients, specializing in **leading technology and digital transformation outsourcing**. We deliver innovative and tech-driven solutions for critical business functions.

Our team of over 250 consultants has carved a niche in the industry by **seamlessly integrating process and technology**. With our depth and breadth of services, we offer decades of experience in identifying, scaling, mobilizing, implementing, and maintaining digital transformation initiatives regardless of where you are in the journey.

Experts who get it done... *better*

Our team drives success by combining process and technology while offering a unique depth of expertise, understanding, and leadership in digital transformation solutions.

In the past 3+ years, I have worked with M&S, and they have been outstanding. They are focused on *delivering high-quality results* and do not disappoint. The M&S team is exemplary in *designing and developing innovative and efficient solutions*. Their ability to develop strong and professional relationships is outstanding. I highly recommend M&S, as they will *bring energy and a can-do attitude* to any assignment.

- Executive Director of Application & Information Services, Higher Education Institution

Government & Diversity Designations

- SeaPort NxG Prime Contract Holder
- SBA HUBZone Certified, Woman-Owned Small Business (WOSB), Small Disadvantaged Business (SDB)
- GSA Multi-Award Schedule (MAS) Contract: GS-35F-0231S SIN: 54151S
- NAICS Codes: 541430, 541511*, 541512, 541513, 51519, 541990, 541611, 51614, 51618, 518210 (*Primary)
- Able to hire and staff cleared personnel
Hiring our Heroes, Talent Alliance, and 1% Pledge

Practice Areas

With M&S Consulting, you gain a partner to provide **immediate access to digital transformation experts**. We take an idea and make it real. But we believe it's done better...*together*.

Our team believes in building relationships designed to propel businesses from one project to the next.

No need to find different consulting firms to address each problem.

Enterprise Applications

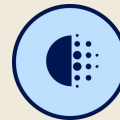

- ERP
- CRM & Martech
- Low-Code Platforms & RPA
- Custom App Dev

Cloud & Infrastructure

Emerging Technology & Artificial Intelligence (AI)

Data Analytics & Integration

Agile Project Management & IT Service Management

Cybersecurity & Identity Management

WHAT WE DO

Service Lines

Our Services

Our team is ready to perform all of these services for a particular value stream or jump into any one of these areas. We're also friendly working in multi-vendor environments.

Advisory

- Fit/gap analysis (as-is and to-be)
- Enterprise architecture, vision, roadmap, and prototypes
- Blueprinting workshops

Implementation

- Execution and implementation
- Program and project management
- Culture of excellence

Managed Services

- Continuous improvement
- 24x7 incl. offshore support
- Onshore service management, operations, and maintenance

Leading Digital Transformation

We are experts at both traditional technologies and modern innovations, differentiating us as uniquely qualified to guide through the transition from old to the new.

Traditional

- On-prem
- Monolithic (all-in-one)
- Best-in-suite
- Waterfall
- Manual Processes

Modernization

Our team guides the transition from traditional solutions to modern innovation through documented vision, cultural alignment, staff, and skill upgrades.

Modern

- Cloud Native
- Integrated
- Best-in-breed
- Agile
- Automated
- (AI, RPA, CI/CD)

WHO WE'VE WORKED WITH

Select Public Sector Clients

We believe successful business solutions are: *Done.Better.Together.*

WORK WITH US

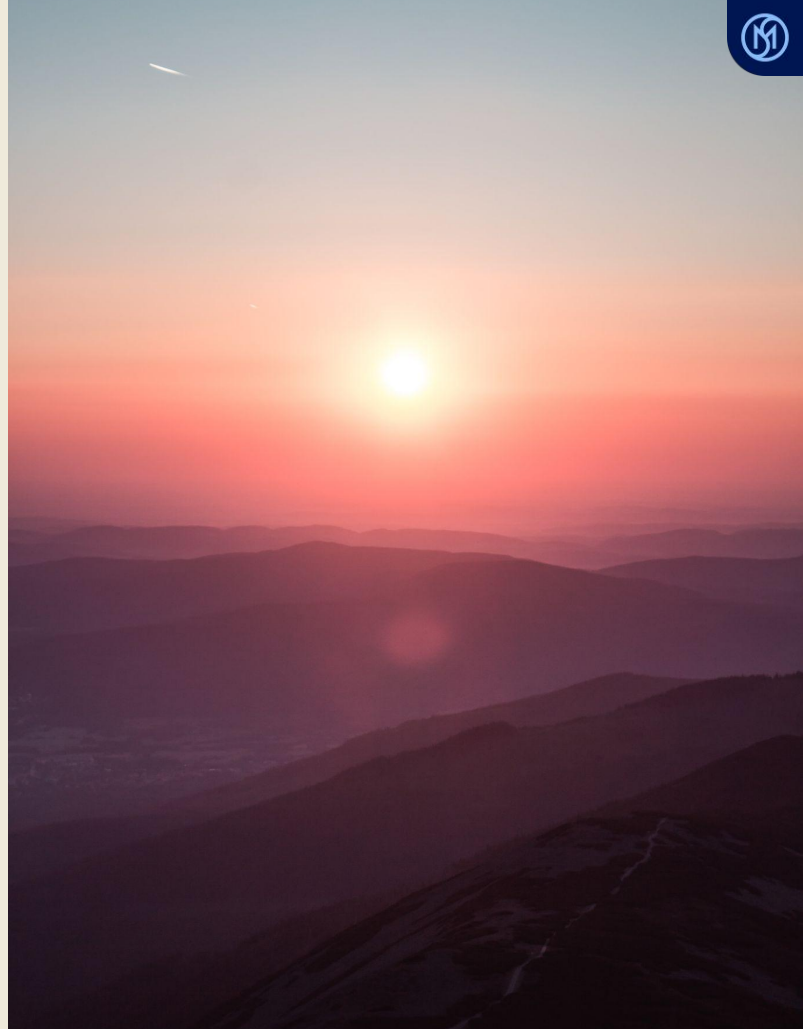

The Impact

We're dedicated to solving your unique business challenges with affordable, scalable, and long-term solutions.

The M&S Consulting team is driven to identify ways to optimize your existing framework, aligned with your mission and vision for the future.

Let's talk.

Contact us at **gov@mandsc.com**,
to get the conversation started.

PRACTICE AREA HIGHLIGHT

Enterprise Applications

Enterprise Resource Planning (ERP)

Optimize your business operations as our team helps you design, implement, and maintain ERP solutions that align with your business goals and enable you to make data-driven decisions.

- ERP Strategy and Architecture Design
- ERP Implementation
(Financial Management, Human Resources Management, Supply Chain Management, Sales/Marketing, Production/Operations Management, BI/Reporting)
- ERP Integration

I didn't realize I needed a strong SI experienced in multiple ERP platforms that could also go deep into CRM, Data Analytics, and Integration — in hindsight, I never could have consolidated our acquisitions into a single Oracle Cloud ERP environment without all these capabilities from M&S.

Enterprise Applications

CRM, CDP, Martech

Revamp your customer engagement strategy and transform from being product-centric to becoming customer-centric. Our comprehensive solutions ensure that you maximize the potential of these tools to grow your business and boost customer satisfaction.

- CRM Selection and Implementation
- CDP for Customer 360, MDM, and Data Enrichment
- Marketing Automation and Segmentation

"M&S CRM and marketing automation services were a game-changer for our organization. Their team helped us streamline our sales processes and improve our lead generation and customer retention. Combined with their data expertise, we were able to gain customer insights while providing the highest levels of customer service in our industry."

TECHNOLOGY HIGHLIGHT

Enterprise Applications

Custom Application Development

Discover the power of innovation with our custom application development expertise that spans multiple industries and technologies, tailored to meet your unique needs.

- Strategy, Assessment, and Architecture
- Development (Web and Mobile Applications)
- Artificial Intelligence and Machine Learning Extensions
- LCAP and COTS (ERP, CRM) Customizations
- Custom Application Infrastructure Administration
- Custom Application Enhancements and Support Services

"The M&S team quickly understood our requirements and developed a highly functional, user-friendly application that exceeded our expectations."

TECHNOLOGY HIGHLIGHT

PRACTICE AREA HIGHLIGHT

Enterprise Applications

Low-Code Application Platforms (LCAP) and Robotic Process Automation (RPA)

We help you accelerate your digital transformation with the power of low code to build applications quickly and efficiently, empowering you to improve business processes, enhance customer experiences, and drive growth.

- LCAP Selection Services
- Enhancements & Maintenance
- Implementation Services (Configuration, Customization, Custom Dev, Integrations)
- AI Integration & Intelligent Process Automation (IPA)

*"M&S has transformed our application development process. We were able to quickly build and deploy custom web and mobile applications while **reducing lines of code by 90%**, saving us time and money both in the short term as well as in long term maintenance."*

TECHNOLOGY HIGHLIGHT

PRACTICE AREA HIGHLIGHT

Cloud and Infrastructure

Unlock the potential of the cloud and modernize your infrastructure. Our team helps you improve IT operations, improve security, and reduce infrastructure risks.

- Cloud (IaaS) Architecture Design, Implementation, and Maintenance
- Infrastructure (Systems Administration)
- DevSecOps
(AIOps, GitOps, CI/CD, IaC, Automated Security Testing)
- Kubernetes

*"We needed a partner that had the expertise to help us navigate the complexities of AWS and Azure multi-cloud environments, and Kubernetes. M&S helped us **design, implement, and manage** our cloud infrastructure and Kubernetes clusters to optimize our cloud environments."*

PRACTICE AREA HIGHLIGHT

Data Analytics & Integration

We help you develop a comprehensive data strategy, integrate and manage your data, and leverage advanced analytics tools and techniques to gain insights and drive growth.

- Data Warehousing and Data Lakes
- ETL/ELT and Data Transformation
- Data Visualization and Business Intelligence
- AI and Machine Learning

*“We now have the **insights we need to make data-driven decisions quickly and accurately.** The implementation of our data lakehouse and machine learning models has taken our analytics to the next level, providing us with predictive **insights that we never thought possible.**”*

TECHNOLOGY HIGHLIGHT

PRACTICE AREA HIGHLIGHT

Emerging Technology & Artificial Intelligence

With traditional enterprise and modern technology experts, we're uniquely qualified to guide the transition from old to the new.

Our team guides the transition from traditional solutions to modern innovation through documented vision, cultural alignment, staff, and skill upgrades.

Our AI experts can help you with:

- Strategy and roadmap
- Data architecture
- Document Info Extraction
- Cloud Infra and AIOps
- Security and governance
- Smart workflow automation
- Application development
- Enterprise AI Integration

*Using AI, M&S developed an innovative solution that is much **better**, much **faster**, and much **less expensive** than our previous process. Very rare to get all three benefits at once.*

TECHNOLOGY HIGHLIGHT

PRACTICE AREA HIGHLIGHT

Agile Project Management & IT Service Management

Maximize your business potential with our expert services in Project Management and ITSM. Our team helps you streamline your operations, optimize service delivery, and improve business outcomes.

- Project Management including Agile, Scrum, and SAFe Coaching
- IT Service Management
- Organizational Transformation
- Platform Implementations and Integrations

*"M&S streamlined our IT service management processes, and adopt the SAFe framework for agile development. Thanks to their expertise, we were able to **improve our business agility, reduce costs, and accelerate time-to-market.**"*

TECHNOLOGY HIGHLIGHT

PRACTICE AREA HIGHLIGHT

Cybersecurity & Identity Management

Our team helps you integrate systems and applications, manage user identities, and secure your data and systems.

- Integration Platform Selection and Implementation
- System and Application Integration
- Identity and Access Management Services (Identity Governance, Identity Analytics, Access Management)

"M&S helped us streamline our operations, connect our disparate systems, and automate workflows. We were able to improve our business agility and responsiveness."

"M&S helped us manage user identities more efficiently and improve our security posture. Thanks to their expertise, we were able to implement comprehensive security measures that protect our systems and data."

PAST PERFORMANCE

INDUSTRY

Aerospace Industry

SOLUTIONS

Systems Engineering Services
IV&V Services

NASA's Artemis Programs including Orion, SLS, MCC, EGS, HLS, and Gateway are utilizing a Model Based Systems Engineering (MBSE) approach for systems engineering. Our employees have served in two primary roles, as a systems engineer and as an IV&V provider.

As part of the systems engineering team, we develop requirements, use cases, architectures, and tests using Cameo Simulation and MagicDraw tools. We utilize the SysML language for system level elements of definition and the Unified Modeling Language (UML) for the software elements.

As part of the IV&V team for the Artemis Program we utilize a software only simulation for every system that makes up the Artemis program. Using the software only simulation we generate tests that provide coverage on the flight software as well as the models. Rapita Verification Suite (RVS) is used to generate coverage data on the mostly C and C++ code that makes up Artemis.

PAST PERFORMANCE

INDUSTRY

SOLUTIONS

IV&V Services

M&S Consulting supported Boeing Corporation in advancing the development and certification of its aerial refueling system for the KC-46A Pegasus tanker—an essential component of Boeing’s defense manufacturing operations. The system required rigorous DO-178C certification to meet FAA compliance standards.

As the Independent Verification and Validation (IV&V) provider, M&S played a critical role in streamlining the certification process and supporting Boeing’s ability to bring the system to production efficiently. Our responsibilities included requirements analysis and traceability, code analysis using Klocwork and Code Composer Studio, and coverage testing with VectorCAST to ensure comprehensive validation of over 9 Kilo Source Lines of C code developed for a Texas Instruments flight board.

To support accurate simulation and reduce the need for early-stage physical testing, M&S also integrated a software-based frequency generator to emulate fuel flow within the system, and develop critical analytics/reporting. M&S collaborated closely with the FAA’s Designated Engineering Representative (DER), delivering all required engineering artifacts that led to successful certification—helping Boeing maintain high standards in both product quality and regulatory compliance across its manufacturing and maintenance processes.

Mulesoft Integration

USDA Rural Development is a mission area within the United States Department of Agriculture which runs programs intended to improve the economy and quality of life in rural parts of the United States.

Our project was significantly boosted by the Salesforce development skills of M&S Consulting's Senior Developer. They joined a team that was initially behind on their delivery of a custom loan application for the USDA Universal Rural Loan Application (URLA). We were entrusted with the complex greenfield application UI/UX development using Lightning Aura components. Their responsibilities also included building Salesforce requests and responses to third party Mulesoft integration endpoints, leveraging JSON to create and update records within Salesforce.

As part of the USDA Animal and Plant Health Inspection Service (APHIS), the Certification, Accreditation, Registration, Permitting, and Other Licensing (CARPOL) program is a web-based application that provides authorizations of various forms to allow the movement of specifically regulated agricultural commodities into and through the US.

M&S Consultants supported the CARPOL program by providing bug fixes and enhancements to current USDA applications using Lightning Web Components (LWC), Apex, Lightning Aura Components, and Visualforce. M&S's SFDC Architect provides senior leadership to junior developers, empowering them to use Salesforce debugging tools to solve bugs and defects. Once again, **our team offered deep technical enterprise expertise to functional teams, properly writing and pointing to Agile (Agile Accelerator) stories for current and future work.**

The Federal Retirement Thrift Investment Board TSP is a retirement savings and investment plan for Federal employees and members of the uniformed services, including the Ready Reserve. FRTIB's mission is to help current and former civilian employees and members of the uniformed services prepare for their retirement years via the TSP.

M&S Architects and developers utilized a blend of SFDC Out of the Box (OOTB) functionality: Flows, Page Layouts, Lightning Pages, Permission Sets, Digital Experiences (Communities), Custom Objects, and Custom Fields; Custom functionality where OOTB was not sufficient: Lightning Web Components (LWC), Aura Components, and Apex, facilitating a tailored experience to internal and external Salesforce users. **We took data at high volumes into consideration and evaluated Salesforce synchronous and asynchronous performance during high volume and high CPU usage windows.** M&S implemented and contributed to robust code design principles, supporting Salesforce enterprise development.

The State of Ohio, Department of Medicaid manages and tracks data for over 3 million Ohio recipients. The Department procured Salesforce and specifically, Field Service Lightning, as a solution to meet their field service requirements. However, the department lacked the skill-sets necessary to implement and support the solution.

M&S engaged with the department to implement the Field Service Lightning application. Additionally, M&S instituted a support plan for the application and managed operations following the initial implementation. M&S also trained department staff members on the application in order to transition responsibilities for operating the application to the department team.

M&S provides support for Information Technology Support Services at NETL, a National Laboratory under the Department of Energy Office.

In-house software and solutions are developed and maintained for NETL across many Microsoft products. Custom code solutions allow for better alignment with the customer's business needs and processes. Many applications in this system were developed in .NET using C# and provide solutions using the PowerPlatform Canvas applications.

Furthermore .Net web applications were developed with interfaces to Microsoft Active Directory to allow for **automation of onboarding, offboarding, and business processing tasks performed at NETL.**

Recently, PowerPlatform solutions and governance processes were developed. These defined the security and coding pipeline processes to allow for the standardization for releasing enterprise solutions into the environment. **Many of the PowerPlatform applications leverage the SharePoint Online Environment and Microsoft SQL Server for persistent data.**

Business Intelligence and Analytics of data are provided by the use of Cognos and Tableau. **Multiple application data sources are combined to create reports and dashboards that provide meaningful insights for guidance and business decisions.**

The FBI's Criminal Justice Information Services Division, or CJIS, is a high-tech hub that provides state-of-the-art tools and services to law enforcement, national security, intelligence community partners, and the general public. CJIS's mission is to equip law enforcement, national security, and intelligence community partners with the criminal justice information they need to protect the United States while preserving civil liberties.

M&S Consulting supports the CJIS Division's Collaborative Tools Platform (CTP), which is comprised of the collaboration tools utilized by the various development teams at CJIS. M&S is responsible for the underlying infrastructure (housed in AWS GovCloud) as well as the integration of the Atlassian suite of applications. M&S integrates the Atlassian applications (Jira, Confluence, Jira Service Management, Bamboo and Bitbucket) to support the Divisions IT Service Management (ITSM), software development, and Continuous Integration / Continuous Delivery (CI/CD) needs. Constant attention is given to the security posture of the system to ensure compliance with applicable cyber security requirements and maintain the platform's Authority to Operate (ATO).

EPRI (Electric Power Research Institute) is a nonprofit organization that conducts cutting-edge research and development to enhance the reliability, efficiency, affordability, and sustainability of the electric power manufacturing sector. Serving utilities, government agencies, and global energy stakeholders, EPRI operates within a highly regulated, security-sensitive environment involving critical infrastructure and complex, non-standard international data.

M&S Consulting partnered with EPRI across four strategic initiatives, helping to refine and modernize their approaches to machine learning, cybersecurity, and advanced analytics:

- **Predictive Maintenance Analytics:** Developed analytics models to anticipate equipment failures in power generation, enhancing reliability and operational efficiency.
- **Intelligent Plant Maturity Models:** Defined progressive models for digital transformation, covering sensors, digital workers, advanced diagnostics, and process automation.
- **Analytics Reference Architecture:** Designed a robust architecture for managing structured and unstructured data, incorporating distributed databases, secure data warehousing, and scalable machine learning pipelines.
- **Machine Learning Evaluation:** Conducted a comprehensive comparison of top ML platforms using real-world operational data to identify the most effective tools for predictive maintenance.

Through these efforts, M&S Consulting strengthened EPRI's data-driven decision-making, enabled more effective predictive insights, and supported secure, scalable innovation in a critical, highly regulated industry.
